SUMMARY

Full-stack-oriented Frontend Developer with 1.5+ years of experience building scalable, responsive web applications from scratch in a fast-paced startup environment. Proven ability to own the entire development lifecycle from translating Figma designs into pixel-perfect UIs to integrating APIs, optimizing performance, and deploying production-ready solutions. Adaptable and resourceful, having delivered multiple projects independently across logistics, e-commerce, and ERP domains.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Kotlin, SCSS, CSS, HTML
Frontend Libraries & Frameworks: React, Next.js, Remix, Ionic, Bootstrap, Tailwind, Shadcn, React MUI
Backend Technologies: Javalin, Hapi.js, Ebean ORM, Sequelize, PostgreSQL
State & Data Management: Zustand, React Context, IndexedDB
Developer Tools: Git, GitHub, VS Code
Other Skills: Advanced Microsoft Word, Microsoft Excel

EXPERIENCE

365Build Technologies — Bangalore, Karnataka
Software Developer — *Jan 2024 – Present*

- Independently handled full lifecycle development of multiple client-facing platforms in a fast-paced startup environment.
- **E-Waybill Management System:** Built a React + Bootstrap platform for logistics clients to generate, update, and track ewaybills, including bulk Excel processing, transporter changes, and expiration alerts.
- **Sales Dashboard:** Developed a cross-platform sales analytics dashboard (Ionic, React, TypeScript, React Charts) with daily, monthly, and yearly plant-wise insights.
- **E-Commerce Platform:** Created a responsive Next.js store with Razorpay integration, dynamic cart management (Zustand), and custom SCSS styling.
- **GSP GST Filing App:** Designed a React + Tailwind + Hapi app for GST filing via government APIs, supporting Excel bulk uploads, discrepancy detection, and pre-submission validation.
- **Workflow & Document Management System:** Built a React + ChartJS system with role-based logins (Admin, Approver, User) for digitized approvals, document tracking, and hierarchical assignments.
- Additional projects: Promotional website for the ewaybill platform; AI-powered chat interface trained with client data for ewaybill-related queries.
- **Women-Only Social Media Platform (In Development):** Designing and building a community-driven platform inspired by Reddit and Meetup, tailored for women. Completed backend in Kotlin, Javalin, Ebean, and PostgreSQL with all API endpoints and database integration. Currently collaborating with UI/UX designers to transform Canva layouts into Figma, and implementing the frontend in Remix (expected completion: Oct 2025).

EDUCATION

Visvesvaraya National Institute of Technology (VNIT) — Nagpur, MH
Master of Science in Mathematics — *2016 – 2018*

Institute of Science — Nagpur, MH
Bachelor of Science in Physics, Electronics, and Mathematics — *2013 – 2016*

CERTIFICATIONS

UI Development with React | *Infocampus, Marathalli, Bangalore* — 2023
Advanced Microsoft Word | *Udemy* — Link

PROJECTS

E commerce website | *React, JavaScript, Bootstrap, CSS, and HTML* Link
- Developed a twin module (User and Admin) Shopping Website using JSON API with React as the frontend
- In the User module of the website, user can add/delete items to cart and buy them
- In the Admin module, different sellers can create account, add/delete details of the items they want to sell, and check out the details of the users who bought said items
- The User module is the default website. To access the Admin module of the website, the seller needs to register an account through the User module and login through the same

My Portfolio | *JavaScript, Bootstrap, CSS, HTML* Link
- My portfolio website made using JavaScript, Bootstrap, CSS, and HTML
