EXPERIENCE

365Build Technologies — Bangalore, Karnataka
Software Developer — *Jan 2023 – Present*

- **Ewaybill Management System:** Developed a web platform using React and Bootstrap that enables logistics companies to generate, update, renew, and manage ewaybills, with bulk Excel processing, transporter changes, and expiration tracking.
- **Promotional Website for Ewaybill Platform:** Created a responsive website using React and Bootstrap to advertise and showcase the features of the ewaybill management platform to potential clients in the logistics industry.
- **AI-Powered Chat Interface for Ewaybills:** Built a client and admin-facing website where clients could interact with an AI for ewaybill queries, while admins could upload Excel files to train the AI with new ewaybill data, using React and Bootstrap.
- **Sales Dashboard for Concrete ERP:** Developed a sales dashboard using Ionic, React, React Charts, Typescript, and Bootstrap, showing sales data (daily, monthly, yearly) across plants with responsive graphs, and app-download capabilities.
- **E-Commerce Website:** Designed a fully responsive e-commerce website using plain CSS/SCSS, Next.js, Zustand for state management, and integrated Razorpay for payments, allowing users to manage their cart and make purchases.
- **GSP Demo App for GST Filing:** Created a responsive GSP app using React, Shadcn, Tailwind, Hapi, and Sequelize to simplify GST filing with government APIs, Excel bulk uploads, discrepancy checks, and error validation before submission.
- In addition to this, I resolved bugs and added features to existing projects as required by the clients. I also integrated APIs with the frontend.

Technical Skills

Libraries: React, React MUI, Shadcn
Languages: JavaScript, Typescript, SCSS, CSS, HTML
Frameworks: Next.js, Ionic, Bootstrap, Tailwind
Developer Tools: Git, GitHub, VS Code
Backend Tools: Hapi.js, Sequelize, Axios
Other skills: Advanced Microsoft Word, Microsoft Excel

Education

Visvesvaraya National Institute of Technology (VNIT) — Nagpur, MH
Master of Science in Mathematics — *2016 – 2018*

Institute of Science — Nagpur, MH
Bachelor of Science in Physics, Electronics, and Mathematics — *2013 – 2016*

Certifications

UI Development with React | *Infocampus, Marathalli, Bangalore* — 2023
Advanced Microsoft Word | *Udemy* — Link

Projects

Prachi Stores | *React, JavaScript, Bootstrap, CSS, and HTML* — Link
- Developed a twin module (User and Admin) Shopping Website using JSON API with React as the frontend
- In the User module of the website, user can add/delete items to cart and buy them
- In the Admin module, different sellers can create account, add/delete details of the items they want to sell, and check out the details of the users who bought said items
- The User module is the default website. To access the Admin module of the website, the seller needs to register an account through the User module and login through the same

My Portfolio | *JavaScript, Bootstrap, CSS, HTML* — Link
- My portfolio website made using JavaScript, Bootstrap, CSS, and HTML
